EDUCATION

Toronto Metropolitan University (Formerly Ryerson)

Bachelor of Science in Computer Science

Toronto, ON

Sep 2024 – Jun 2028

- **Awards:** Dean's List (2024, 2025)
- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Computer Architecture, UNIX/C/C++, Networks, Software Engineering

EXPERIENCE

Full-Stack Developer (Remote)

April 2026

Scholar Pools

Florence, AZ, USA

- Delivered a production business website using Next.js, TypeScript, and Tailwind CSS, enabling the client to capture leads online.
- Built an end-to-end contact funnel with client-side validation and transactional email delivery via the Resend API.
- Boosted monthly organic traffic by 10% by implementing a sitemap, robots.txt, Open Graph metadata, and JSON-LD structured data.

PROJECTS

Octheia | React, JavaScript, Chrome Extension API | *Hackathon Winner*

Jan 2026

- Came first in a competitive hackathon by engineering a Chrome extension that makes the web accessible for visually impaired users via real-time DOM manipulation.
- Implemented color-correction modes for three forms of color blindness (Protanopia, Deuteranopia, Tritanopia) with WCAG-compliant contrast ratios.
- Persisted accessibility preferences across sessions using the Chrome Storage API, delivering a seamless return experience without reconfiguration.

PlateSense | JavaScript, Node.js, MongoDB, Gemini API

Feb 2026

- Built an AI-powered diabetes meal assistant that analyzes meal photos in real time, predicting glucose impact based on carb content and personal health profiles.
- Engineered a QR-based mobile upload system using WebSockets to stream live camera photos from phone to dashboard with sub-second latency.
- Developed an interactive 3D brain health visualization and integrated Gemini API to generate personalized weekly meal and exercise plans tailored to each user's diabetes profile.

Co-op Support Application | React, TypeScript, Node.js, PostgreSQL | *Academic Project*

April 2026

- Architected a full-stack co-op management platform with three role-based portals (student, coordinator, employer) covering the full application and evaluation lifecycle.
- Secured the platform with JWT authentication, email verification, and invite-only onboarding for privileged roles.
- Built a coordinator dashboard with provisional/final review workflows, bulk actions, compliance reporting, and automated email reminders for overdue submissions.

AI Finance Dashboard | React, TypeScript, FastAPI, Firebase, Gemini API | *HackHive 2026*

Jan 2026

- Developed a full-stack finance platform that parses CSV bank statements, classifies transactions with AI, and produces 90-day probabilistic cash flow forecasts.
- Built an AI advisor with a conversational chat interface and using ElevenLabs text-to-speech, enabling users to query and interpret their own financial data.
- Designed a financial calendar overlaying real transaction history with future projections, backed by Firestore for real-time sync and jsPDF for report exports.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, SQL, Bash/Shell

Web & Frameworks: React, Next.js, Vue.js, Tailwind CSS, FastAPI, Express.js, HTML/CSS

Libraries & Tools: TensorFlow, MediaPipe, NumPy, OpenCV, Node.js, Vite, WebSockets, JWT, Git, AWS EC2, JIRA

Databases: PostgreSQL, MongoDB, Firebase
